UNSW Women in Maths and Science Champions Program
Early Career Scientists
November 2018- August 2019

Women in Maths and Science Champion Program
The Women in Maths and Science Champions Program is a unique opportunity to strengthen participants communication and leadership skills while creating a platform for women in maths and science. The Early Career Scientists stream of the Program is designed to provide women with the skills and confidence to build their public profile, make a positive impact to the broader science community and establish a connected network of women in maths and science.

The program consists of five focused development workshops, career coaching and opportunities to apply program learnings through the ongoing role as a maths and science champion.

- ‘Rock your LinkedIn Profile’.

Career Coaching
Participants will undertake two one-on-one coaching sessions. These coaching sessions are designed for participants to identify their strengths, set career goals and strengthen their leadership development.

Women in Maths and Science Champion Role
The Maths and Science Champion Role is focused on developing the life-long skills required to adopt an advocacy role for women considering careers in maths and science. The role involves:
- Promoting an interest in maths and science through sharing personal journeys, career aspirations, innovations and contributions to society;
- influencing and inspiring school-age students to pursue further study in maths and science;
UNSW Women in Maths and Science Champions Program
Early Career Scientists
November 2018- August 2019

- engaging with current UNSW Science students about their student experience and options to continue their studies and pursue a career in maths and science;
- contributing to Social Engagement, Global Impact and Leadership activities that add value to UNSW Science, the broader sector and/ or community in the context of the UNSW 2025 Strategy.

The role requires a minimum 20 hours of outreach activities throughout the Program.
