

SCIF2041 RESEARCH INTERNSHIP A & SCIF3041 RESEARCH INTERNSHIP B ENROLMENT APPLICATION

The Faculty of Science research internship courses involve a short theoretical or experimental research project supervised by an academic staff member. The internship may encompass project planning, literature review, project development, fieldwork, experimental work, statistical analyses and oral and written reporting. The format of the course is flexible and decided upon by both the student and academic, however, it should involve the same amount of work as a standard 6 unit of credit course, i.e. 150 hours total, including class contact hours, other learning activities, preparation and time spent on all assessable work. Assessment may involve such tasks as a literature review, a lab report, a mock / real manuscript for a target journal, etc. **NB: these courses are only available in Advanced Science programs.**

INSTRUCTIONS

- Locate a potential supervisor and discuss the possibility of a research internship.
- Agree on the expected work for the proposed project, assessment tasks, and deadlines and add the information to this form.
- Submit the form to the Science Student Centre for confirmation and enrolment.
