Attention: Careers Teachers

Museum of Human Disease

Your Brilliant Brain

Brain Awareness Week – 18th & 19th March 2020

Designed to inspire year 8-10 students in science and technology Your Brilliant Brain is a series of workshops providing a unique experience through hands-on investigations of the human brain. Activities include demonstrations of neural function in human subjects, as well as microscopic examination of brain tissue. Topics covered include perception, learning and sensory motor-control.

The Museum of Human Disease is the only Pathology collection regularly available to schools, and Brain Awareness Week teams us with the Sydney Chapter of the Society of Neuroscience and the UNSW School of Medical Science. Your students will be interacting with UNSW researchers on engaging and informative content.

Each session will include 2 hours of interactive, hands on workshops with syllabus-linked worksheets provided for students.

Outcomes:
Students will develop knowledge and understanding of:

- **STEM careers**
- The nature and practice of science
- Applications and uses of science
- Implications of science for society and the environment
- Current issues, research and development
- Models, theories and laws, and structures and systems related to the living world.

Specifically
- SC4/5 1VA
- SC4/59WS
- LW1
- SC4/56WS
- SC4/5 14LW
- LW3
- SC4/515LW
- SC4/57WS
- LW4

Places are limited and therefore bookings are essential. See next page.
